## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, taken alone or in combination, fails to disclose or render obvious an image read out apparatus comprising a stimulating light beam source, a line sensor comprising a plurality of photoelectric converter element, and a refractive index profile type lens array that provides the photoelectric converter elements and the refractive index profile type lenses of the refractive index type lens array arranged at pitches such that the frequency band of the periodic pattern generated due to the pitches of the lenses in the lens array are higher than the frequency band of a radiation image information reproduced on the basis of the image signal, in combination with the rest of the limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

***Isoda (US 6,444,997 B2)*** discloses a radiation image read-out apparatus that includes a refractive index profile type lens and image modification means that uses processed image
